MODULAR ENTRY RAMP

TRANSITIONS™

Transitions™ Entry Ramps is a line of slip-resistant aluminum ramps that make it easier for your customers to cross doorways and raised landings. All of the products work well both indoors and outdoors.

The product lineup includes the freestanding aluminum Modular Entry Ramp system that works on thresholds ranging from 3/4" - 6" high, including sliding glass doors and raised landings.

The aluminum Angled Entry Ramp, with legs that individually adjust up to 2" in height, is ideal for uneven surfaces, such as decks and lawns. The ramp is made for single step rises and accommodates doors swinging both in and out. Simply add a second ramp side by side for wider doorways.

ANGLED ENTRY RAMP

THSS 12 | 12" x 36" x 1"

THSS 24 | 24" x 36" x 1"

Stack them up and build it as high as you need.

THR 250
2" x 24" x 48"

THR Riser 225
2" x 24" x 24"
(2 each)

THR 250
2" x 24" x 48"

Unique Feature: The THR 250 can also be used as a Rubber Cargo Wedge

MODULAR ENTRY MAT

TRANSITIONS™

Transitions™ Entry Mats is a line of slip-resistant rubber mats that make it easier for your customers to cross doorways and raised landings. All of the products work well both indoors and outdoors.

The stylish black color of the Rubber Angled Entry Mat, along with its beveled sides, gives this product the appearance of an inviting welcome mat. It can be trimmed to fit doors up to 36" in width. Since the ramp does not interfere with door tracks, it's ideal for sliding glass doors.

The final product in the EZ-ACCESS Transitions line includes the Modular Entry Mat. This 48" wide customizable mat, when combined with additional ramps and risers, works perfectly for thresholds with wider doors and entryways. Both mats include integrated size guides to make trimming accurate and easy.
